

Smaller Field Options

Valley® 5000 series

The Valley 5000 series has been developed to provide a cost effective irrigation solution for smaller fields up to 60 acres. This durable machine was created specifically for production agriculture and comes with the reliability and aftermarket support that only Valley dealers can provide. The Classic control panel is available for the 5000 series basic operations.

5000 series specifications:

- 5" diameter pipeline
- 820' maximum machine length
- 108" outlet spacing
- 112.5' – 202.5' span lengths
- 1HP booster pump option
- Single-phase power option
- One towable design option uses a 3-point hitch for easy towing with a category 2 or 3 tractor hitch

Single Span Spinner Drive

The Valley Single Span Spinner Drive is designed to address the needs of growers with small fields or limited access to electricity. This single span pivot is driven by water pressure and offers all of the structural and mechanical advantages of any Valley center pivot.

Single Span Engine Drive

The Valley Single Span Engine Drive is the ideal option for irrigating small fields up to 6 acres wherever electric power is not readily available. All sprinkler packages are available to deliver efficient water applications with low water pressure, providing significant energy, labor and water savings.

Towable Pivots

Valley towable pivots provide another solution for growers who have a need for irrigation on their smaller production ag fields. Because these machines can be moved from one field to another, growers can economically irrigate more acres with one center pivot. Towable options include: Quick Tow, 2-Wheel E-Z Tow, and 4-Wheel E-Z Tow.

Valley has the right machine for every field!
