

8000 series Center Pivot

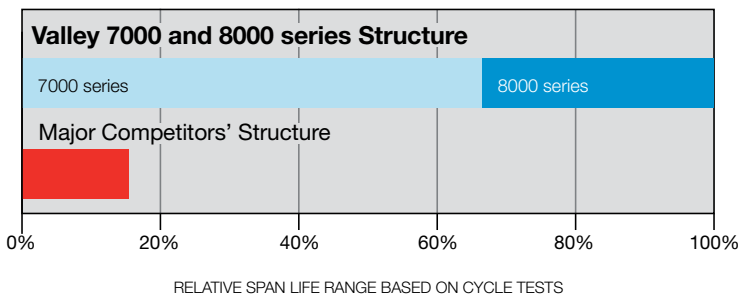

The top-of-the-line, Valley 8000 series was engineered for long durable life and has been field tested to handle the most demanding terrain and operating stresses any machine could experience. Take advantage of the benefits this machine has to offer such as: the longest span in the industry at 225' and options to ensure maximum field coverage, such as bender and corner products.

8000 series Specifications

- 6 5/8", 8", 8 5/8", or 10" pivot point options
- 6", 6 5/8", 8 5/8" and 10" pipe diameter options
- 2, 5 or 7.5 HP booster pump
- Maximum machine length up to 24 spans covering 2800'

Accelerated Structural Life Cycle Test Comparison

Valley has developed a standard, accelerated life cycle test based on past field performance for both Valley and competitive spans so you can see how they match up. This test subjects the spans to conditions that the span could experience on rough ground with large tires. The span with the longest cycle test life can be expected to last the longest in similar field conditions.

These test results shown to the left were certified by an independent professional engineering consultant and prove Valley spans on average last 5 to 6 times longer than our closest competitors' spans.

Structure Options for Different Crop Heights

Standard Profile Drive Units

- Clearance: 9' 4" – 10' 0"

Low-Profile Drive Units

- When standard clearances are not required
- Low-Profile clearance: 6' 2" – 6' 5"

*Actual clearances in the field will vary based on wheel track depths, span lengths, field terrain and various operating conditions.

The Most Durable Pivot in the Industry, and now the longest span in the Industry at 225'!
